SUMMARY

Computer Science and Artificial Intelligence student focused on leveraging technology to address real-world challenges through ethical systems. Proficient in designing algorithms and developing AI applications, with expertise in mitigating AI bias and ensuring fairness. Active contributor to OWASP AI Exchange, promoting best practices in AI development. Dedicated to practical learning and applying skills in software engineering and machine learning to foster responsible innovation.

TECHNICAL SKILLS

- Software Development: Requirements Gathering, Unit Testing, Technical Documentation, Algorithm Development,
- Machine learning: Supervised/Unsupervised Learning, Model Development & Evaluation
- Languages: Python, Java, JavaScript, SQL
- Frameworks/tools: React, Node.js, GitHub, Visual Studio, IntelliJ IDEA, Eclipse, and Xcode
- Protocols: HTTP, LDAP, ODBC, JDBC
- API: REST, SOAP
- Authentication Protocols: OAuth, OIDC, SAML, JWT, WebAuthn, and Basic
- Cloud: Azure, Amazon AWS, GCP
- AI/ML: TensorFlow, Scikit-learn.

EXPERIENCE

Vertically Integrated Research Program / Kennesaw State University - Marietta, Georgia *08/2025 - Current*

- Collaborated with faculty and interdisciplinary team members on applied research in [insert your research focus area — e.g., AI fairness, cybersecurity, robotics, etc.].
- Designed and tested algorithms using Python, TensorFlow, and Scikit-learn to analyze and model data.
- Presented findings in team meetings, strengthening technical communication and cross-disciplinary collaboration.
- Contributed to [poster, publication, prototype, or dataset, if any], advancing project goals and gaining experience in real-world research methodology.

Research Asst Intelligent Swarm Robots at the Edge / Kennesaw State University - Marietta, Georgia

09/2025 - Current

- Programmed robotic behaviors and sensor responses, applying neural networks and swarm intelligence concepts.
- Designed and executed experiments to evaluate robotic decision-making under varied environmental conditions, improving testing efficiency.
- Implemented and analyzed algorithms on hardware platforms to assess system performance and identify optimization opportunities.
- Delivered weekly progress reports and presented findings to faculty and collaborators, enhancing technical communication and presentation skills.
- Co-authored research documentation, including a final project report, a draft research paper, and contributions to external grant proposals.

- Strengthened research methodology skills, including experimental design, data analysis, and systematic problem-solving.

Associate Software Developer / Information Security Xperts - Duluth, GA

06/2023 - 08/2025

- Developed and maintained Java and React Native mobile applications, improving client workflows and functionality.
- Implemented 50+ unit tests, reducing production bugs, and ensuring code met quality assurance standards.
- Authored technical documentation and user guides, improving product adoption and client onboarding.
- Collaborated with senior developers to define requirements and design new features, applying problem-solving and teamwork in a professional environment.
- Debugged and optimized existing applications.
- Supported product releases by testing new versions prior to deployment, ensuring smooth rollouts.
- Provided technical support for users experiencing difficulties with software applications.

EDUCATION AND TRAINING

Bachelor of Science: Software Engineering
Kennesaw State University - Kennesaw, GA

Expected in 05/2028

- GPA: 4.0 / 4.0

High School Diploma

05/2025

Brookwood High School - Snellville, GA

ACCOMPLISHMENTS

- **Honors Cohort Program**, Kennesaw State University
- **Dean's List**, Kennesaw State University — Summer 2025
- **First-Year Scholars Program**, Kennesaw State University

ACTIVITIES AND HONORS

- Member, OWASP (Open Web Application Security Project) and OWASP AI Exchange
- Member, Artificial Intelligence Club, Kennesaw State University
- Member, Analytics and Data Science Organization
- Member, Autonomous Underwater Vehicle Team
